

Test RFP - Two Tier

Total Images: 20

Pages: 10

Project Requirements:

- General software development project
- Cloud infrastructure setup (AWS/Azure)
- API development and integration
- Database design and optimization
- Security and authentication system

Page 2 - Technical Specifications

- Technical requirement 2.1: System architecture design
- Technical requirement 2.2: Database schema planning
- Technical requirement 2.3: API endpoint documentation
- Technical requirement 2.4: Security implementation
- Technical requirement 2.5: Performance optimization

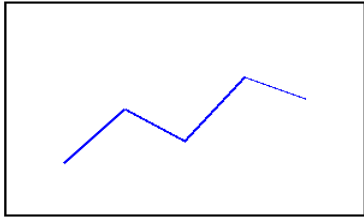

Chart 1: Performance Metrics

Page 3 - Technical Specifications

- Technical requirement 3.1: System architecture design
- Technical requirement 3.2: Database schema planning
- Technical requirement 3.3: API endpoint documentation
- Technical requirement 3.4: Security implementation
- Technical requirement 3.5: Performance optimization

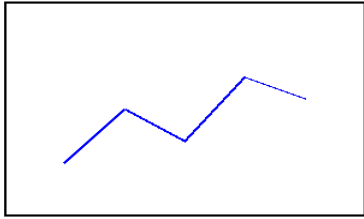

Chart 3: Performance Metrics

Page 4 - Technical Specifications

- Technical requirement 4.1: System architecture design
- Technical requirement 4.2: Database schema planning
- Technical requirement 4.3: API endpoint documentation
- Technical requirement 4.4: Security implementation
- Technical requirement 4.5: Performance optimization

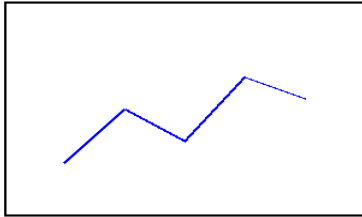

Chart 5: Performance Metrics

Page 5 - Technical Specifications

- Technical requirement 5.1: System architecture design
- Technical requirement 5.2: Database schema planning
- Technical requirement 5.3: API endpoint documentation
- Technical requirement 5.4: Security implementation
- Technical requirement 5.5: Performance optimization

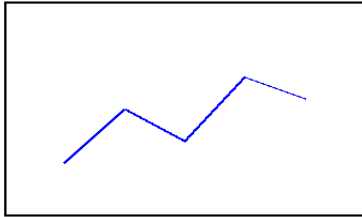

Chart 7: Performance Metrics

Page 6 - Technical Specifications

- Technical requirement 6.1: System architecture design
- Technical requirement 6.2: Database schema planning
- Technical requirement 6.3: API endpoint documentation
- Technical requirement 6.4: Security implementation
- Technical requirement 6.5: Performance optimization

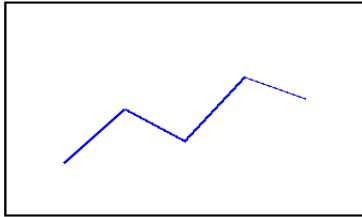

Chart9: Performance Metrics

Page 7 - Technical Specifications

- Technical requirement 7.1: System architecture design
- Technical requirement 7.2: Database schema planning
- Technical requirement 7.3: API endpoint documentation
- Technical requirement 7.4: Security implementation
- Technical requirement 7.5: Performance optimization

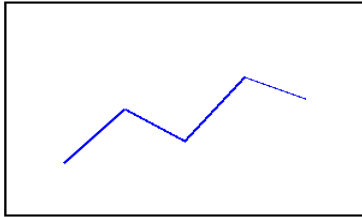

Chart 11: Performance Metrics

Page 8 - Technical Specifications

- Technical requirement 8.1: System architecture design
- Technical requirement 8.2: Database schema planning
- Technical requirement 8.3: API endpoint documentation
- Technical requirement 8.4: Security implementation
- Technical requirement 8.5: Performance optimization

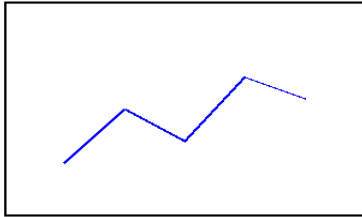

Chart 13: Performance Metrics

Page 9 - Technical Specifications

- Technical requirement 9.1: System architecture design
- Technical requirement 9.2: Database schema planning
- Technical requirement 9.3: API endpoint documentation
- Technical requirement 9.4: Security implementation
- Technical requirement 9.5: Performance optimization

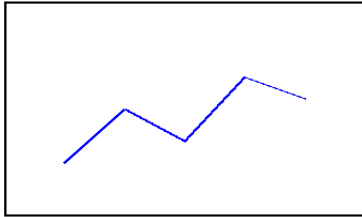

Chart 15: Performance Metrics

Page 10 - Technical Specifications

- Technical requirement 10.1: System architecture design
- Technical requirement 10.2: Database schema planning
- Technical requirement 10.3: API endpoint documentation
- Technical requirement 10.4: Security implementation
- Technical requirement 10.5: Performance optimization

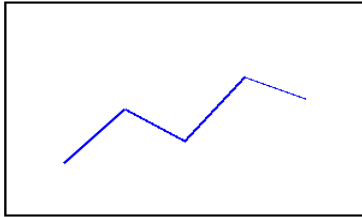

Chart 17: Performance Metrics
